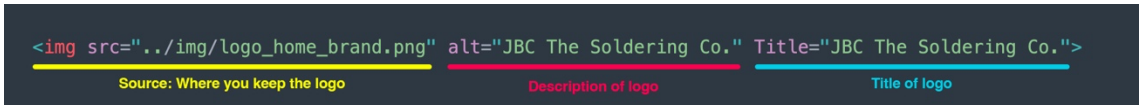
Dear Team,

As part of our collaboration, we agreed to display the JBC logo on your website. We kindly request that you ensure the logo is properly linked to our website: www.jbctools.com.

Here are three key points to consider when implementing this update:

1. The logo should be linked to our website: www.jbctools.com.
2. Please include ALT text for the logo, such as “JBC The Soldering Co.” to make it descriptive.
3. Inside the page where you located our logo, add relevant keywords like “Soldering Station” or “Soldering Irons”.
4. It’s important to ensure that the link is a “follow” link, meaning it should not include rel="nofollow" in the link code.

Note: Please use our logo with the tagline ¨The Soldering Co.¨

Thank you for your attention to this matter. Please let us know once the updates are completed or if you need any further assistance.


Best regards,
JBC Soldering Tools.
